

ELECSOFT-SYSTEMS
CAD & SOFTWARE DESIGNERS

<https://elecsoft-systems.co.in/>

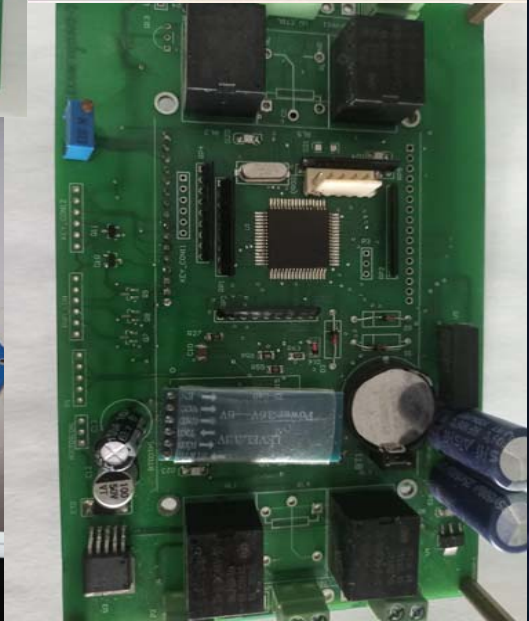

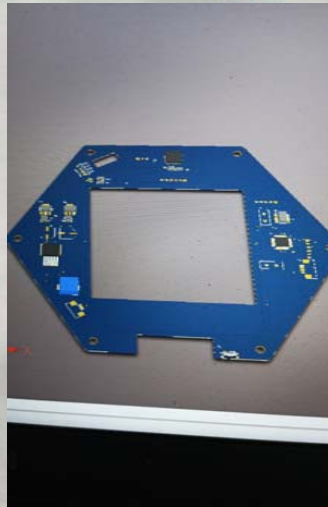

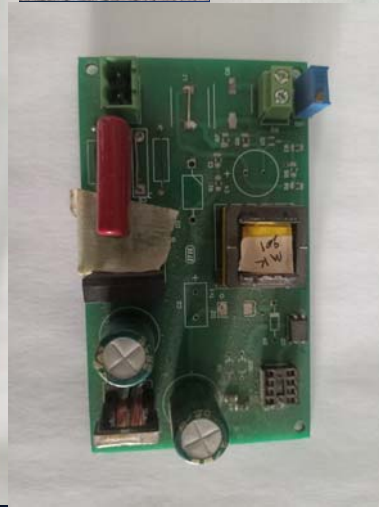

About Us

We are the one-stop solution for Embedded Designing. We are always eager to discover new ideas and concepts and like to explore new design possibilities with our products. We can design product/systems from scratch as per the customer's specifications. Our Mission is to build innovative products to solve real-world problems. We can handle both big and small projects, be it for big industries or for small industries or individuals. We can take complete ownership of the product lifecycle right from the design to manufacturing and then delivering to the customer.

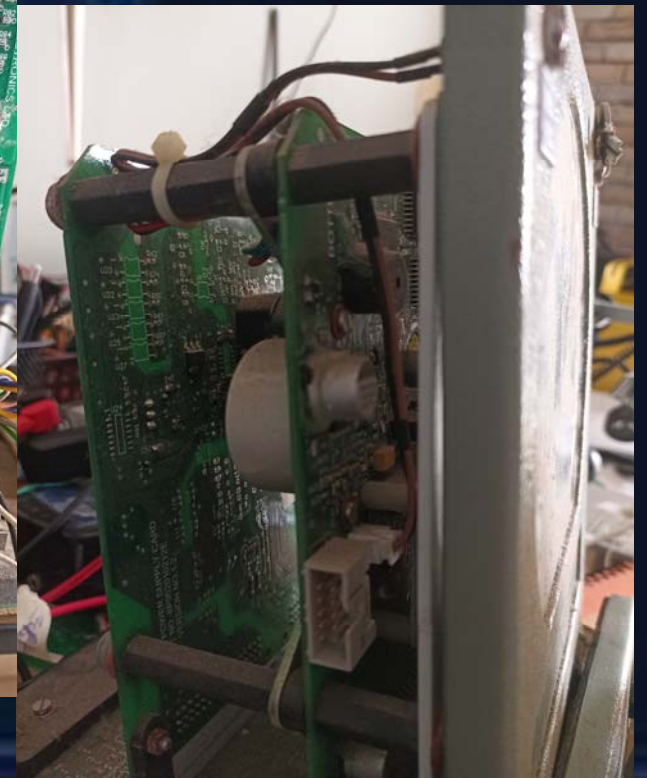

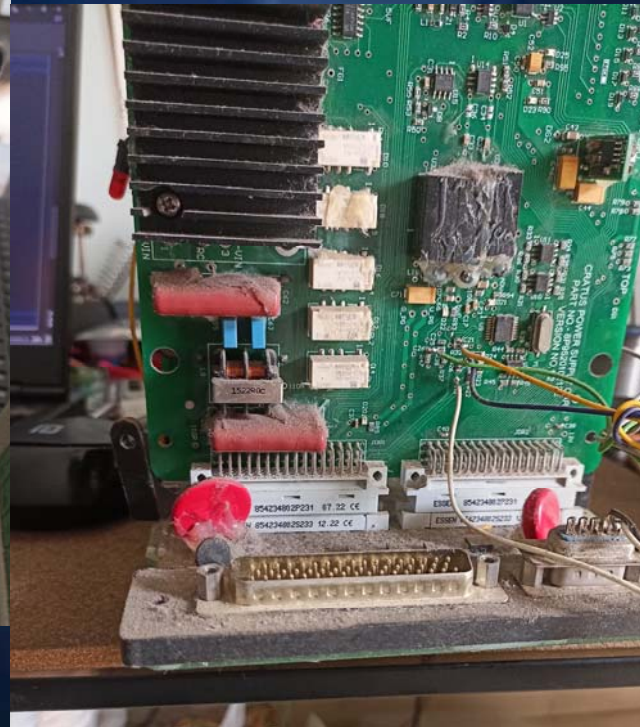

Services

1. Designing and implementing Linux Kernel-based Device Drivers for ARM, PowerPC, and x86-based hardware.
2. Designing FPGA-based peripheral co-processors.
3. AI-based solutions.
4. Customised solutions for Home Automation.
5. Requirement-based Embedded Software design.
6. Custom Built PCB Design and Development and mechanical enclosures as per customer requirements.
