

UL USA and UL Canada Certified Component Selection for Electric Vehicle Battery Manufacturer

The task involved identifying components that were certified by both UL USA and UL Canada, ensuring compliance with safety standards for the BMS project.

- Explored UL listings for components in both the USA and Canada to find components compliant with both certification standards.
- Engaged in discussions with various manufacturers to ascertain the availability of UL-certified components meeting project requirements.

Application:

- UL safety standards compliance

Tools Used:

- Div Checker
